Putting It All Together: General Nursing RN

Now that we have covered the **PAL**, **Patient List**, **Task List**, **Allergies**, and Documented **Medications by History**, let's do an activity to bring everything together using your **Cerner Practice** **Patient**.

"Putting It All Together" Activity

PAL, Patient List, Task List, Allergies and Medications by History

Step	Action
1.	**Close** the chart for your ***Classroom*** *patient*. **Note**: You will see an alert that you are closing a chart that has a PowerPlan in a Planned state. We will discuss PowerPlans later, but know that if you see this alert in Prod, you will want to contact the physician.
2.	**Open** the chart for your ***Cerner Practice Patient***.
3.	*Complete* the **Fall Risk Level – Adult** task from the Task List.
4.	**Document** a home medication that your patient is taking: **Fish Oil**.

Putting It All Together: General Nursing RN

	Now that we have covered the **I/O / I-Flowsheet** and **PPOCs** (Patient Plans of Care), let's do an activity to bring everything together. Use your **Cerner Practice** patient:

"Putting It All Together" Activity

I/O I-Flowsheet and PPOCs

Step	Action
1.	*Duplicate* the **Physical Assessment** documented earlier for the next hour.
2.	*Accept* the **PPOC Prevention of Alteration in Skin Integrity**: • Keep **all** of the pre-selected **Goals**, **Indicators**, and **Interventions**; (grey selections are required) and Sign the PPOC.

Now that we have covered **Orders**, **Medication Administration**, and **Lab Scanning**, we will do an activity to bring it all together, using your **Cerner Practice Patient**:

Cerner had a scheduled downtime and you had to take an RVTO order for Wellbutrin from the physician for your patient and administer it without scanning. Cerner came back up and now you need to enter the medication order and chart the medication administration from the MAR for the current Time:

"Putting It All Together" Activity

Orders, Medication Administration, and Lab Scanning

Step	Action
1.	**Open** the chart for your **Cerner Practice** **patient**.
2.	*Order* **Wellbutrin 100mg** tablet BID. • Dr. Andrew Nigh / Dictation #: 14031 • RVTO
3.	*Nurse Review* the medication from the **Nurse Review** band.
4.	Document the **Wellbutrin** (manually/not with a scan) on the **MAR**.
